Breastfeeding supplies and support for new parents

As part of your health plan benefits, you may be eligible to receive breastfeeding supplies and support – such as a breast pump and lactation support services – from network providers at no additional cost.

How to get a breast pump

- 1. Check the list of participating breast pump suppliers by calling the toll-free phone number on your health plan ID card. TTY users can dial 711 or sign in at myuhc.com.
- 2. Contact one of the participating doctors or approved suppliers to request an electric breast pump up to 30 days before your delivery date.
- 3. Once your request is approved, a breast pump will be sent to you.
- 4. The provider or breast pump supplier will bill UnitedHealthcare for reimbursement.

Eligible supplies and services covered by most plans at

\$0

out-of-pocket
