

## Save time and resources with customized benefits microsites

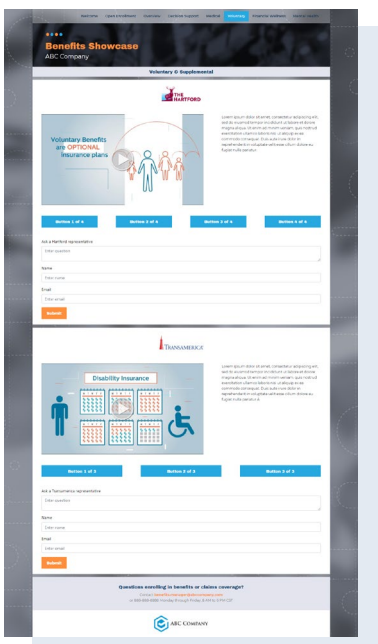

Flimp's Virtual Benefits Showcases are a practical, affordable and flexible alternative to expensive virtual health fairs. These **mobile-responsive, multi-page websites organize your content by topic so employees, spouses and new hires can quickly and easily access the information they need.** These branded, customized websites track employee engagement and can be easily updated and distributed via email, text messages or web links.

We make the set-up process fast and easy. Simply choose the benefits topics/modules you want in your Showcase, then send us your content by vendor or topic, including logos, videos, PDF files, SBCs, presentations, contact info and links to provider websites. All videos and files are hosted and web forms can be used to capture employee feedback and questions.

## Employees Can Explore and Learn About Their Benefits

View Showcase Examples

### Flexible, customized solution

## Annual Pricing and Implementation

Pricing starts at **\$6,000** for up to eight modules/pages for one year.

We require **2 to 4 weeks from the time we receive all the content** to create, customize and populate your microsite.

Please note: the client is responsible for gathering and providing the benefits content for the microsite to your project manager.
