

Rx Solutions

Specialty Copay Assistance Program

Rx Solutions team of pharmacists and clinical coordinators manage our Specialty Copay Assistance Program, coordinated with your pharmacy benefit manager (PBM), to provide specialty drug cost management strategies and reduce overall healthcare dollars spent. Our shared goal is to support safe, clinically appropriate, and cost-effective use of specialty medications.

What

Rx Solutions is here to assist you and/or your family members in finding financial assistance to cover most, if not all, of the cost of the specialty prescription.

Why

Specialty medications are used to treat chronic, complex, and sometimes rare conditions. These specialty medications can be costly. They often have unique handling or storage requirements and may need frequent dosage adjustments or routine laboratory monitoring.

How

Our clinical team can help members taking these high-cost specialty drugs sign up for available copay assistance. If you and/or your family member are taking a specialty medication you should receive an introduction letter and phone call from our team.
