

Getting Started with SmartConnect™

About SmartConnect

Free Medicare education and enrollment resource for employees & families.

Medicare Supplement | Medicare Advantage Prescription Drug Plans | Dental, Vision, and Hearing Plans | Ancillary Coverage

What is SmartConnect?

The SmartConnect team educates employees and their family members about their Medicare options. We help people identify and enroll in Medicare plans that can save them money, and potentially add extra benefits. We also relieve pressure from HR departments by having a reliable and trusted place to refer employees when they need Medicare guidance.

How much does it cost the employee? Nothing! SmartConnect is a NO COST service for the employee. The only cost an employee will see is when they enroll in a plan, there are no hidden fees or extra costs.

Who can use the SmartConnect?

Anyone who is Medicare-eligible including employees and their spouses, children, parents, neighbors, and friends.

In which states are your agents licensed?

SmartConnect agents are licensed and appointed in all 50 states.

DID YOU KNOW?

SmartConnect agents offer unbiased advice and are not incentivized to favor any plan over another. Our licensed agents will help each person understand their options and which plan types may work best for them based on their unique circumstances.

SmartConnect & Your Organization

When should an employee call SmartConnect to speak with a licensed agent?

We encourage people to call when they first approach Medicare eligibility (usually when they are turning 65) and want to learn more about their options outside of employer coverage. If they find a Medicare plan suited for their needs, our SmartConnect agents will help them to enroll and transition off of the group plan confidently.
