

Two Easy Steps To Enroll

- 1) Complete a patient intake form. Our HIPAA compliant portal allows for a 1–2-minute completion of a patient intake form.
- 2) Kindly ask the clinician to send RxProtect the script. Our team can receive scripts via ecribe, fax, or paper copy (as uploaded into the portal). By whatever method a clinician would like to send a script, we can accept.

Dedicated Nurse, Supported By Pharmacists

Success in healthcare is realized through the building of relationships. A dedicated nurse will work one on one with enrollees to ensure the highest level of care, care continuum, and care management. Our nurses have a huge heart for people and work diligently to make a difference in the lives of those they help. Members are in great hands with our nurse team.

High Levels of Communication

RXP 5G TRACKERS

Cutting edge remote RxP 5G temperature monitoring trackers capture and transmit:

- Hyper-accurate medication location,
- Temperature,
- Humidity,
- Shock, and
- Light exposure

RxP 5G Trackers utilize global cellular, WiFi, and GPS technology to monitor cold chain medication shipments with a cloud application aggregating shipping data in real time delivering immediate alerts if a shipment goes wrong allowing our customer support team to take immediate action.

The RxP 5G tracker is fully compliant with both FDA 21 CFR Part 11 and GxP (GAMP 5).
