DIABETES CARE PATH (DCP)

HOW MEDONE HELPS YOU MANAGE YOUR DIABETES

Overview

As you may know roughtly 1 in 10 Americans have diabets han 37 million Americans have diabetes (about 1 in 10 It is continually one of the most difficult and intricate chronic disease states to manage, impacting around 11% of the U.S. general population. A common contributor to kidney failure, lower-limb amputations, and adult-onset blindness, active and attentive intervention is crucial. MedOne's Diabetes Care Path provides enhanced diabetes management by connecting members with crucial resources that aid in their disease state management. These resources include certified diabetes educators, free diabetic testing supplies, smart glucometers, and medication treatment plan optimization. This multi-faceted approach helps ensure diabetic members are set up to achieve the best possible treatment outcomes.

How It Works

MedOne members and adult dependents (18 years and older) are invited to join DarioHealth, an easy-to-use digital diabetes management and healthy living program. Diabetic coaching services and select testing supplies are offered at no cost to qualified members once the program is activated. A smartphone is all that is needed to start a member on their path to better health. The member will have access to the tools needed to succeed, including:

- The free DarioHealth mobile app, for tracking, tips, and more
- A personalized program, including tips for better blood glucose management & weight loss, healthy recipes, and other recommendations
- A pocket-sized blood glucose monitoring system that connects directly to your smartphone and makes following your progress easy
- Individual health coaching, when and if you want it, for support, advice, and a little extra help
- A customized roadmap for taking simple steps toward better health outcomes

Direct Diabetes Management

With MedOne's Diabetic Care Path you can expect:

- Decreased overall healthcare expense though prioritizing diabetes care
- Enhanced patient experience through an integrated dedicated care team
- Direct communication with prescribers to optimize medication treatment plans
- Full scale reporting providing knowledge that your diabetic population is optimizing disease management

KEY COMPONENTS

Utilizing a smart glucometer, members can actively manage their health and easily collaborate with their prescriber and health coach to ensure the best health outcomes.

MedOne's Diabetes Care Path program is a fully integrated approach within the prescription benefit offering.

Members are connected with a certified diabetic health coach to assist in active management of the disease state.

There is no member disruption when implementing this program as all interventions are voluntary.

If you have questions or need help getting started, call a DarioHealth Enrollment Specialist at 833-739-1354, Monday-Friday from 9:00AM - 9:00PM EST.
