First Stop Health

Give Your Family 24/7 Doctor Access!

When your family members need care, our doctors are here 24/7! Here's how your dependents can access First Stop Health.

Add your family

In order for dependents to access the service, primary members must add them to their profile.

1. Log in on the mobile app or at firststophealth.com
2. Select "Family" and click "Add Family"
3. Add your family member's information

We recommend adding a personal email to make sure your family member can access information!

Find their account

Once added to the primary membership, family members over 18* can request a visit on their own profile!

1. Go to firststophealth.com or download the mobile app
2. Select "Find My Account" and enter information
3. Enter a password
4. Your family member can now request a visit!

Device tips: On your tablet or phone, download the First Stop Health app in your app store. If you're on a desktop or web browser, use Google Chrome for the best experience.

Download the app

Scan to get the app, go to firststophealth.com or call (888) 691-7867.

*Family members under 18 will need an adult to request a visit for them. You can still create a separate profile to manage their visits.
