The lowest prescription price. Every single time.

ClearSaveRx finds you the lowest available price before you reach the pharmacy counter.

Nearly one in three American adults has skipped, delayed, or cut back on a prescription because of cost.[1] ClearSaveRx helps remove the guesswork by applying the lowest price each time you fill a prescription.

How it works:

Every time you fill a prescription, ClearSaveRx compares your insurance price with available discount card pricing and applies the lower cost. There's nothing extra for you to do.

No comparison shopping.

ClearSaveRx checks available pricing for you, helping ensure you receive the lowest available price when filling your prescription.

Your savings still count.

With traditional discount cards, your out-of-pocket costs don't count toward your health plan. ClearSaveRx helps you access lower pricing while still applying eligible amounts toward your deductible and out-of-pocket maximum.

Nothing to sign up for.

ClearSaveRx is already built into your Vivid Clear Rx coverage.

ClearSaveRx by VIVID CLEAR Rx®

ClearSaveRx helps you save on prescriptions without changing the way you use your pharmacy benefit.
