

## Unlock Affordable Prescriptions with Our Distinct Rx Advantage *International Program*

TrueScripts is thrilled to introduce the fully integrated **Distinct Rx Advantage International Program** offering you the opportunity to access affordable medications from countries such as Canada, New Zealand, Australia, and the UK.

While specialty and brand-name medications in the U.S. can be expensive, international sourcing (or personal importation) offers a cost-effective solution, allowing members to purchase eligible medications from outside the U.S. at significantly lower prices.

Once enrolled, your medications will be delivered right to your doorstep. Our program ensures exceptional value and service, redefining patient care and cost savings.

### What are the benefits of international sourcing?

Our prescription ordering process is seamless, convenient, trustworthy, and secure. Licensed pharmacists review all prescriptions for clinical relevance, safety, and efficacy. Rigorous Drug Utilization Review (DUR) and stringent dispensing process ensure world-class safety and quality.

### Where will my medications come from?

Regulated and licensed pharmacists dispense these medications from approved countries. Medications are brand-name medications in original sealed manufacturer's packaging. Drugs requiring temperature control are shipped using best-in-class cold chain shipping. The medication you receive through this program will be exactly the same as what you currently take. TrueScripts regularly visits these pharmacies to ensure compliance and quality.

### How do I get started?

We will review your medications to proactively identify if the program can save you money. If so, you will receive communication on how to enroll in the program. Otherwise, if you currently take a medication listed on our international formulary, you may call us at **844-257-1955** to enroll.
